

Thank-you for your interest in Shaw Woodworks and taking to time to review our website. www.shawwoodworks.com

As we do not produce a catalogue this is our statement of work past and present.

Since its beginnings in 1987, Shaw Woodworks has experienced unprecedented growth, establishing itself as a preferred & trusted architectural millwork and interactive kiosk and display supplier to Canada's biggest names in grocery, retail, manufacturing and finance. For example, we are the national fixture supplier to all of the Loblaw Cos. banners in Canada as well as Indigo Books and Music. In addition, we are a world supplier of inter-active game kiosks to McDonalds Restaurants with on-going production contracts with Kidzpace Interactives.

We are located in Collingwood, Ontario (an hour and half north of Toronto) with 100 employees and 70M sq. foot production and warehouse operation. We use direct modeling CAD software and have CNC capabilities as well as a modern architectural millwork facility. Manufactured to the highest standards using solid, kiln dried Canadian hardwoods stained and finished in catalyst lacquers, MDF, MCP, and veneer core plywood construction, powder coated plate and tubular steel, plastic laminates and ceramics, stainless steel, acrylics, plexiglas & roto-molded plastics, non-carcinogenic paints and inks.

Whether it's a local or export client, when we begin a relationship with a customer, we take the time to fully understand the client's business and fixture goals, so that through Shaw's core competency of design and value engineering, we can manage to facilitate our client's on-time and budget expectations.

As a new fixture supplier to your firm we would apply that same approach.

We look forward to working with you

Sincerely
Shaw Woodworks Inc.

A handwritten signature in black ink that reads "John". The signature is written in a cursive, flowing style.
